

Instructions for EMNLP 2023 Proceedings

Anonymous EMNLP submission

Abstract

This document is a supplement to the general instructions for *ACL authors. It contains instructions for using the L^AT_EX style file for EMNLP 2023. The document itself conforms to its own specifications, and is, therefore, an example of what your manuscript should look like. These instructions should be used both for papers submitted for review and for final versions of accepted papers.

1 Introduction

These instructions are for authors submitting papers to EMNLP 2023 using L^AT_EX. They are not self-contained. All authors must follow the general instructions for *ACL proceedings,¹ as well as guidelines set forth in the EMNLP 2023 call for papers. This document contains additional instructions for the L^AT_EX style files. The templates include the L^AT_EX source of this document (EMNLP2023.tex), the L^AT_EX style file used to format it (EMNLP2023.sty), an ACL bibliography style (acl_natbib.bst), an example bibliography (custom.bib), and the bibliography for the ACL Anthology (anthology.bib).

2 Engines

To produce a PDF file, pdfL^AT_EX is strongly recommended (over original L^AT_EX plus dvips+ps2pdf or dvi2pdf). XeL^AT_EX also produces PDF files, and is especially suitable for text in non-Latin scripts.

3 Preamble

The first line of the file must be

```
\documentclass[11pt]{article}
```

To load the style file in the review version:

```
\usepackage[review]{EMNLP2023}
```

¹<http://acl-org.github.io/ACL/PUB/formatting.html>

Command	Output	Command	Output
<code>{\ "a}</code>	ä	<code>{\c c}</code>	ç
<code>{\ ^e}</code>	ê	<code>{\u g}</code>	ğ
<code>{\ `i}</code>	ì	<code>{\l}</code>	ł
<code>{\ .I}</code>	İ	<code>{\~n}</code>	ñ
<code>{\o}</code>	ø	<code>{\H o}</code>	õ
<code>{\ 'u}</code>	ú	<code>{\v r}</code>	ř
<code>{\aa}</code>	å	<code>{\ss}</code>	ß

Table 1: Example commands for accented characters, to be used in, e.g., BibT_EX entries.

For the final version, omit the review option:

```
\usepackage{EMNLP2023}
```

To use Times Roman, put the following in the preamble:

```
\usepackage{times}
```

(Alternatives like txfonts or newtx are also acceptable.) Please see the L^AT_EX source of this document for comments on other packages that may be useful. Set the title and author using `\title` and `\author`. Within the author list, format multiple authors using `\and` and `\And` and `\AND`; please see the L^AT_EX source for examples. By default, the box containing the title and author names is set to the minimum of 5 cm. If you need more space, include the following in the preamble:

```
\setlength\titlebox{<dim>}
```

where `<dim>` is replaced with a length. Do not set this length smaller than 5 cm.

4 Document Body

4.1 Footnotes

Footnotes are inserted with the `\footnote` command.²

²This is a footnote.

Output	natbib command	Old ACL-style command
(Cooley and Tukey, 1965)	<code>\citep</code>	<code>\cite</code>
Cooley and Tukey, 1965	<code>\citealp</code>	no equivalent
Cooley and Tukey (1965)	<code>\citet</code>	<code>\newcite</code>
(1965)	<code>\citeyearpar</code>	<code>\shortcite</code>
Cooley and Tukey’s (1965)	<code>\citeposs</code>	no equivalent
(FFT; Cooley and Tukey, 1965)	<code>\citep[FFT;][[]]</code>	no equivalent

Table 2: Citation commands supported by the style file. The style is based on the natbib package and supports all natbib citation commands. It also supports commands defined in previous ACL-style files for compatibility.

4.2 Tables and figures

See Table 1 for an example of a table and its caption.

Do not override the default caption sizes.

4.3 Hyperlinks

Users of older versions of L^AT_EX may encounter the following error during compilation:

```
\pdfendlink ended up in different
nesting level than \pdfstartlink.
```

This happens when pdfL^AT_EX is used and a citation splits across a page boundary. The best way to fix this is to upgrade L^AT_EX to 2018-12-01 or later.

4.4 Citations

Table 2 shows the syntax supported by the style files. We encourage you to use the natbib styles. You can use the command `\citet` (cite in text) to get “author (year)” citations, like this citation to a paper by Gusfield (1997). You can use the command `\citep` (cite in parentheses) to get “(author, year)” citations (Gusfield, 1997). You can use the command `\citealp` (alternative cite without parentheses) to get “author, year” citations, which is useful for using citations within parentheses (e.g. Gusfield, 1997).

4.5 References

The L^AT_EX and BibT_EX style files provided roughly follow the American Psychological Association format. If your own bib file is named `custom.bib`, then placing the following before any appendices in your L^AT_EX file will generate the references section for you:

```
\bibliographystyle{acl_natbib}
\bibliography{custom}
```

You can obtain the complete ACL Anthology as a BibT_EX file from <https://aclweb.org/anthology/anthology.bib.gz>. To include both

the Anthology and your own .bib file, use the following instead of the above.

```
\bibliographystyle{acl_natbib}
\bibliography{anthology,custom}
```

Please see Section 5 for information on preparing BibT_EX files.

4.6 Appendices

Use `\appendix` before any appendix section to switch the section numbering over to letters. See Appendix A for an example.

5 BibT_EX Files

Unicode cannot be used in BibT_EX entries, and some ways of typing special characters can disrupt BibT_EX’s alphabetization. The recommended way of typing special characters is shown in Table 1.

Please ensure that BibT_EX records contain DOIs or URLs when possible, and for all the ACL materials that you reference. Use the `doi` field for DOIs and the `url` field for URLs. If a BibT_EX entry has a URL or DOI field, the paper title in the references section will appear as a hyperlink to the paper, using the `hyperref` L^AT_EX package.

Limitations

EMNLP 2023 requires all submissions to have a section titled “Limitations”, for discussing the limitations of the paper as a complement to the discussion of strengths in the main text. This section should occur after the conclusion, but before the references. It will not count towards the page limit.

The discussion of limitations is mandatory. Papers without a limitation section will be desk-rejected without review. ARR-reviewed papers that did not include “Limitations” section in their prior submission, should submit a PDF with such a section together with their EMNLP 2023 submission.

126 While we are open to different types of limi-
 127 tations, just mentioning that a set of results have
 128 been shown for English only probably does not re-
 129 flect what we expect. Mentioning that the method
 130 works mostly for languages with limited morphol-
 131 ogy, like English, is a much better alternative. In
 132 addition, limitations such as low scalability to long
 133 text, the requirement of large GPU resources, or
 134 other things that inspire crucial further investiga-
 135 tion are welcome.

136 Ethics Statement

137 Scientific work published at EMNLP 2023 must
 138 comply with the [ACL Ethics Policy](#). We encourage
 139 all authors to include an explicit ethics statement
 140 on the broader impact of the work, or other ethical
 141 considerations after the conclusion but before the
 142 references. The ethics statement will not count
 143 toward the page limit (8 pages for long, 4 pages for
 144 short papers).

145 Acknowledgements

146 This document has been adapted by Yue Zhang,
 147 Ryan Cotterell and Lea Frermann from the style
 148 files used for earlier ACL and NAACL proceedings,
 149 including those for ACL 2020 by Steven Bethard,
 150 Ryan Cotterell and Rui Yan, ACL 2019 by Douwe
